DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. **As per claim 1 and 8 and dependent claims 2-7 and 9-20 respectively**, the examiner found no reference in the prior art that disclosed or made obvious a radiographic apparatus wherein a radiation source and detecting means are arranged such that a radiation axis linking the radiation source and detecting means is inclined at a predetermined angle relative to a sectional axis passing through a site of interest of an object; and a scan means includes rotating means for rotating the radiation source and detecting means together about the sectional axis as recited in independent claims 1 and 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: **U.S. Patent Application Publication 2002/0006185 A1 to Lienard et al.** discloses a radiography apparatus configured to achieve source-detector arrangements relative to a central axis (19) (see Figs. 1 and 2).
